

Priority Focus Area 2 - In-Home Services Design

The In-Home Services workgroup has continued to meet. There are representatives from across the state. The group had been working with the Mountains and Plains Child Welfare Implementation Center, but we decided to terminate our agreement with the center. It was decided that Child and Family Services had too many other projects and efforts going on to fully engage with the center.

The attached document was developed at the June meeting (and finalized at the August meeting) which will provide a road map for the future work of the workgroup. It was also decided that we will meet for the majority of the day in the July meeting rather than just a two-hour meeting.
